PROJECTS

• Driver Distraction and Drowsiness Detection

By using **YOLO MODEL** and machine learning techniques, we have created a system that predicts the driver distraction

• Canteen Billing System

Developed a efficient and reliable billing system using GUI in Java , Swing components, etc.

• Intelligent PDF Semantic Search & Vector Ingestion Pipeline

Developed a modular ETL pipeline to extract, chunk, embed, and store PDF text using Sentence Transformers and Qdrant with high-speed semantic retrieval. Designed the system to serve as a scalable foundation for RAG and enterprise search applications.
